Monday April 8th 2024

A solar eclipse occurs when the moon “eclipses” the sun. This means that the moon, as it orbits the Earth, comes in between the sun and the earth, thereby blocking the sun and preventing any sunlight from reaching us.

When watching a solar eclipse directly with your eyes, you must look through safe solar viewing glasses (“eclipse glasses”) or a safe handheld solar viewer at all times. Eclipse glasses are NOT regular sunglasses. Regular sunglasses, no matter how dark, are not safe for viewing the Sun.

Enjoy and Be Safe!
